

Compact Portable Navigation Decoying Device IP66 drone Uav Navigation Spoofers

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: MYT
- Model Number: DR200S
- Minimum Order Quantity: 2 units
- Delivery Time: 10 work days
- Payment Terms: L/C, T/T
- Supply Ability: 1000units per month

Product Specification

- Highlight: Portable Navigation Decoying Device, Navigation Decoying Device IP66, Uav Navigation Spoofers

Compact Portable Navigation Decoying Device IP66 drone Uav Navigation Spoofer

1, Product Introduction

This portable navigation decoying device has been specifically developed to address the security threats posed by unauthorized "black" drones. It achieves control over such drones by transmitting low-power regenerated navigation satellite signals (with power output no greater than 10dBm) that infiltrate the navigation systems of the intruding drones.

By disrupting the navigation systems that these drones rely on for flight control, the device prevents them from entering the protected airspace, thereby safeguarding the low-altitude security of the designated area. This decoying method is currently the only solution that meets the technical requirement of $\leq 10\text{mW}$ transmission power stipulated in counter-terrorism and security protection guidelines.

The compact and self-contained design of the device allows for easy deployment and use, while its long-range control and positioning capabilities enable comprehensive protection across a large area. The low-power decoying signal ensures minimal electromagnetic interference, making this a green and safe solution for continuous unattended operation against the threat of "black" drones.

2, Specification

Application Range	Not less than 500m (no less than 360 degrees of coverage)
Work Modality	Civilian UAV Guidance Mode
Transmission Power	≤10dBm (mW)
Power Supply	Can power civilian UAVs or be powered by built-in batteries
Operating Temperature	-40 ~ 70°C
Protection Grade	IP66

Dimensions	450450400mm
------------	-------------

3, After-Sales service

Lifetime free model library upgrades, profesdional 24/7online service, customizable colors and languages.
