## Product Description

### Fixed Drone Detection and Defense Equipment Fixed Anti Drone System Device

#### 1, Product Introduction

The fixed DR200-C drone detection and jamming device consists of a drone detection system and a radio interference system, which can detect, identify, interfere with drones. It can make the drone hover, make an emergency landing or return, effectively protecting the safety of low-altitude airspace and preventing the drone from entering the defense zone. It has excellent detection and defense performance, long-distance working ability, no need for personnel on duty.

#### 2, Functional highlight

- 1) Detachable Design:  
Detection and defense can be integrated or separated, with one detection device and N attack devices connected via a network.
- 2) FPV Strong Interference:  
Default 13 interference frequencies, supports multi-frequency expansion.
- 3) Strong Expandability:  
Expandable with integrated radar, optical, and navigation deception equipment.
- 4) Unmanned Guard:  
Automatically connects to attack and defense areas when a drone is detected.
- 5) Precision Tracking:  
Real-time tracking of drone trajectory, ensuring accurate and efficient countermeasures.
- 6) Military Grade:  
Made of aviation aluminum alloy, fearless of high and low temperatures, strong environmental adaptability.
