

Directional Drone Jammer Portable Anti Drone Equipment for Individual Soldiers BX1 C1

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: MYT
- Model Number: BX1 C1
- Minimum Order Quantity: 1
- Price: Negotiable
- Delivery Time: 15-20 days
- Payment Terms: L/C, T/T
- Supply Ability: 500 units per month

Product Specification

- Weight: 1.8kg
- Frequency: 700-1020 MHz
- Jamming Range: 1000-1500 Mm
- Dimensions: 22.5 * 8.5 * 4.5 Cm
- Highlight: portable anti drone equipment,
directional drone jammer portable,
directional anti drone equipment

Product Description

Directional Drone Jammer Portable Anti Drone Equipment for Individual Soldiers BX1 C1

1, Product Introduction

The BX1 C1 is a portable anti-drone device for individual soldiers, utilizing digital ultra-high frequency broadband seamless jamming technology. It suppresses the signal by emitting interference signals in the same frequency band as the drone. The device can automatically recognize different types and frequency bands of drone signals, and automatically initiates countermeasures without human intervention, causing the drone to lose control and forcing it to land. It is equipped with reliable electronic components and structural design, featuring excellent anti-jamming, shock resistance, and temperature resistance, enabling stable operation in various complex environments.

Whether in security, event protection, or other scenarios, it can effectively exert countermeasures against drones.

2, Specification

Specification	Value
Power	40 Watts
Frequency	700-1020 MHz
Jamming Range	1000-1500 mm
Power Supply	DC 28V
Endurance	60 minutes
Battery	25.9V / 5A
Dimensions	22.5 * 8.5 * 4.5 cm
Weight	1.8 kg

3, After-Sales service

Lifetime free model library upgrades, professional 24/7 online service, customizable colors and languages.

4, Company Profile

Chongqing Miao Yitang Technology Co., Ltd. is a specialized company engaged in anti-drone and unmanned intelligent defense management. With the technical support from the AI Internet of Things Research Institute of the Chinese Academy of Sciences and collaborations with multiple intelligent AI companies, the company has established research laboratories for AI unmanned field products, accumulating a variety of technical patents.

The company's products are widely applied to unmanned automatic management solutions for various defense and perimeter areas, including AI anti-drone systems and AI unmanned vehicle patrol systems. These systems integrate with multiple technologies such as optoelectronics, radar, vibration, thermal imaging, facial recognition, and radio frequency management, truly achieving a 24-hour uninterrupted anti-drone defense and ground perimeter defense warning system. This allows for cost savings for clients, reduction in human resource allocation, and ensures the safety of clients' lives and property. The outstanding security system has won the company an excellent reputation and created higher value for its partners.

5, Certification Certificate

The product has obtained dual certification from the Ministry of Public Security and the National Security Center, and is capable of adapting to various severe incidents, possessing military-grade quality.

6, Partnership Portfolio

Our products are designed for a variety of public safety scenarios and have long provided customized product services to the military and public safety departments, earning an excellent reputation in practical operations.

7, Paking and Delivery

CUSTOMER SERVICE

- * Fast and patient communication: professional sales reply immediately
- * Fast delivery: usually 2-7 days
- * Flexible Safe shipping: fast by air or sea with cheap freight
- * Customer-friendly: complete user manual and exact video training provided
- * After sales service: one year warranty and life time technical support
