Directional Drone Jammer Seven channel Shield type Anti Drone Equipment D7

Basic Information

- Place of Origin: China
- Brand Name: MYT
- Model Number: D7
- Minimum Order Quantity: 1
- Price: Negotiable
- Delivery Time: 15-20 days
- Payment Terms: L/C, T/T
- Supply Ability: 500units per month

Product Specification

- Operating Frequency: 100MHz~6GHz
- Detection Distance: ≥5km Open And Accessible Areas
- Number Of Simultaneous Detections: ≥10 5 Different Manufacturers
- Operating Frequency Band: (890~940)±10MH Z (43±2)dBm
  (1550~1625)±10 MHz (40±2)dBm
  (2400~2500)±10 MHz (40±2)dBm
  (5700~5850)±10 MHz (40±2)dBm
- System Power Consumption: ≤1000W
- Storage Temperature: -60 ~125
- Highlight: **directional anti drone equipment**,
  5km anti drone equipment,
  5km directional drone jammer

Directional Drone Jammer Seven channel Shield type Anti Drone Equipment D7

1, Product Introduction

BSSY-D7 is a 7-frequency high-power shield-type drone countermeasure device, equipped with a built-in lithium battery, simple to operate, and capable of single-frequency control. The device uses narrowband interference technology and RF suppression technology to cut off the connection between the drone and the remote controller, thereby forcing the drone to return to its base.

After the drone is controlled, the image transmission channel is cut off, preventing the transmission of video, aerial photos, and it will not receive any instructions from the ground remote controller, thus achieving protection of key areas and preventing the leakage of privacy.

2, Specification

Feature	English Translation
Power	130W
Interference Range	800-1500 meters
Endurance	50 minutes
Dimensions	33.5*27.5*11.5 cm
Frequency	433 MHz to 6 GHz
Power Supply	AC220V or DC24-28V
Battery	25.9V / 10A
Weight	Approximately 2.9 KG

3, Company Profile

Chongqing Miao Yitang Technology Co., Ltd. is a specialized company engaged in anti-drone and unmanned intelligent defense management.
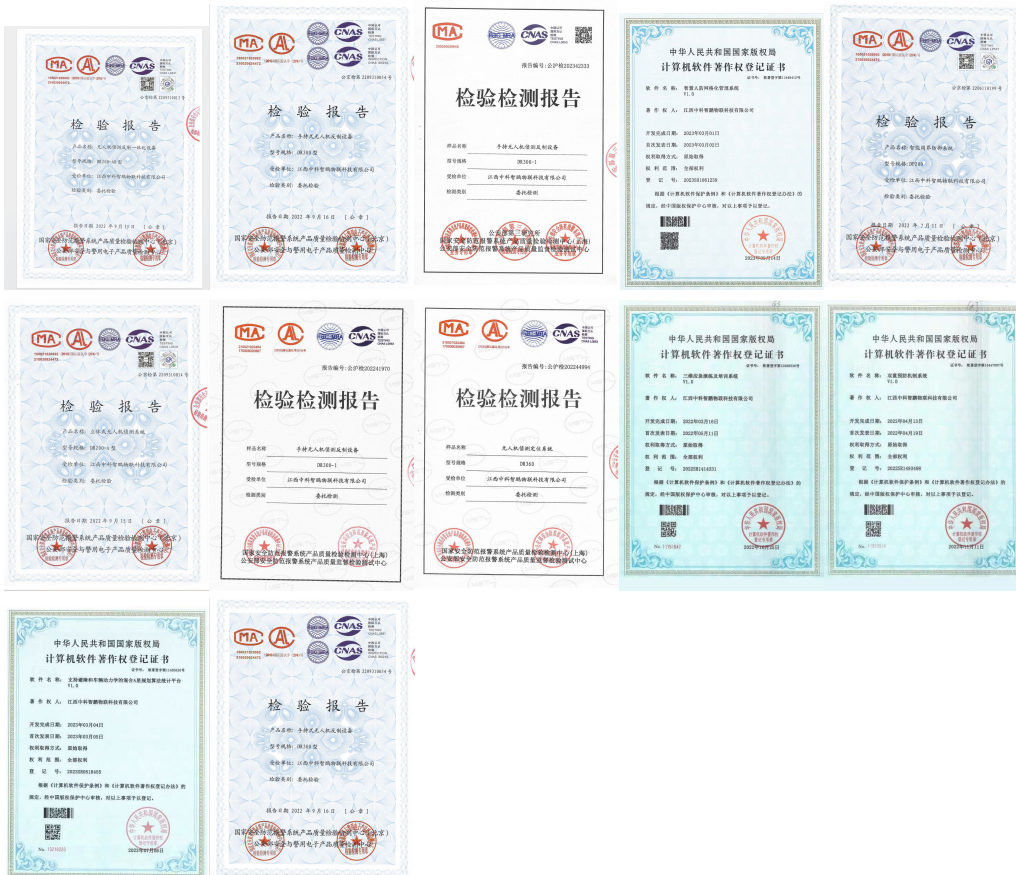

With the technical support from the AI Internet of Things Research Institute of the Chinese Academy of Sciences and collaborations with multiple intelligent AI companies, the company has established research laboratories for AI unmanned field products, accumulating a variety of technical patents.

The company's products are widely applied to unmanned automatic management solutions for various defense and perimeter areas, including AI anti-drone systems and AI unmanned vehicle patrol systems. These systems integrate with multiple technologies such as optoelectronics, radar, vibration, thermal imaging, facial recognition, and radio frequency management, truly achieving a 24-hour uninterrupted anti-drone defense and ground perimeter defense warning system. This allows for cost savings for clients, reduction in human resource allocation, and ensures the safety of clients' lives and property. The outstanding security system has won the company an excellent reputation and created higher value for its partners.

4, Certification Certificate

The product has obtained dual certification from the Ministry of Public Security and the National Security Center, and is capable of adapting to various severe incidents, possessing military-grade quality.

5, Partnership Portfolio

Our products are designed for a variety of public safety scenarios and have long provided customized product services to the military and public safety departments, earning an excellent reputation in practical operations.

6, Paking and Delivery

Supports various logistics methods including shipping, air freight, water transport, and express delivery, covering logistics in 90% of the global regions.
