

Reconnaissance and Attack Integrated Drone Countermeasure Long Range Manufacturers Suppliers Wholesale Factory in stock

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: MYT
- Model Number: G8CD
- Minimum Order Quantity: 1
- Price: Negotiable
- Delivery Time: 10 work days
- Payment Terms: L/C, T/T
- Supply Ability: 10000 units per month

Product Specification

- Frequency: 433Mhz-6GMhz Customized
- Power: 400-600W
- Power Supply: AC220 V
- Weight: 32.3kg
- Highlight: **433mhz drone jammer,**
433mhz anti drone system

Reconnaissance and Attack Integrated Drone Countermeasure Long Range Manufacturers Suppliers Wholesale Factory in stock G8CD

1, Functional highlight

- 1) Automatic detection system, automatically initiates countermeasure procedures.
- 2) Precise detection and countering of drone image transmission models, covering more than 97% of the models.
- 3) 360° omnidirectional detection and countering, 24-hour uninterrupted surveillance.
- 4) Capable of independent operation as a single unit, and can be expanded to connect to a control platform.
- 5) Block remote control and image transmission, interfere with GPS.
- 6) The casing has dense heat dissipation fins on the exterior, and is equipped with 12 large-leaf fans, effectively ensuring the stability of the equipment during long periods and high-intensity operations.

2, Specification

Power	400-600W
Frequency	433M - 6G
Coverage Angle	360°
Power Supply	AC220V
Dimensions	113 * 41 * 23 CM
Weight	32.3KG
Jamming Range	1000 - 3000m

3, Certification Certificate

4, Company profile

Chongqing Miao Yitang Technology Co., Ltd. is a specialized company engaged in anti-drone and unmanned intelligent defense management.

With the technical support from the AI Internet of Things Research Institute of the Chinese Academy of Sciences and collaborations with multiple intelligent AI companies, the company has established research laboratories for AI unmanned field products, accumulating a variety of technical patents.

The company's products are widely applied to unmanned automatic management solutions for various defense and perimeter areas, including AI anti-drone systems and AI unmanned vehicle patrol systems. These systems integrate with multiple technologies such as optoelectronics, radar, vibration, thermal imaging, facial recognition, and radio frequency management, truly achieving a 24-hour uninterrupted anti-drone defense and ground perimeter defense warning system. This allows for cost savings for clients, reduction in human resource allocation, and ensures the safety of clients' lives and property. The outstanding security system has won the company an excellent reputation and created higher value for its partners.
