

High Frequency Band 4G-6.3G Anti Drone Module For Anti Drone 100W-120W

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: MYT
- Model Number: 4000MHz to 6300MHz 100-120W anti-drone module
- Minimum Order Quantity: 2 units
- Delivery Time: 10 work days
- Payment Terms: L/C, T/T
- Supply Ability: 1000units per month

Product Specification

- Required Power Supply: 10A
- Single Gross Weight: 0.7kg
- Power Flatness: 50dBm
- Power: 100-120W
- Frequency: 4GHz-6.3GHz Customized
- Supply Voltage: DC 24-32V
- Specification: 175*84*24mm
- Neutralization Method: Radio Band Jamming
- Storage Temperature: -40 To +85
- Rf Connector: SMA
- Compatibility: Compatible With Various Anti-drone Device
- Highlight: 100w anti drone module,
100w drone jamming module

Product Description

AHigh Frequency Band 4G-6.3G Anti Drone Module For Anti Drone 100W-120W

1, Product Introduction

100-120W, 4GHz to 6.3GHz anti-drone module,

Target Specificity: They can be designed to target specific types of signals or devices within a high-frequency range, which can be beneficial for focused countermeasures.

Efficiency: Operating at high frequencies allows the jammer to interfere with advanced communication systems that operate in these bands.

Advanced Technology: High-frequency jammers often employ sophisticated technology, which can be more effective against modern communication systems.

Reduced Interference: By focusing on a high-frequency band, these jammers can reduce interference with other lower-frequency systems that might still be operational.

Up-to-Date: High-frequency jammers are typically updated to counter the latest communication technologies, ensuring they remain effective against new threats.

Regulatory Compliance: In some regions, operating within certain high-frequency bands may be subject to fewer regulations, making it easier to deploy high-frequency jammers.

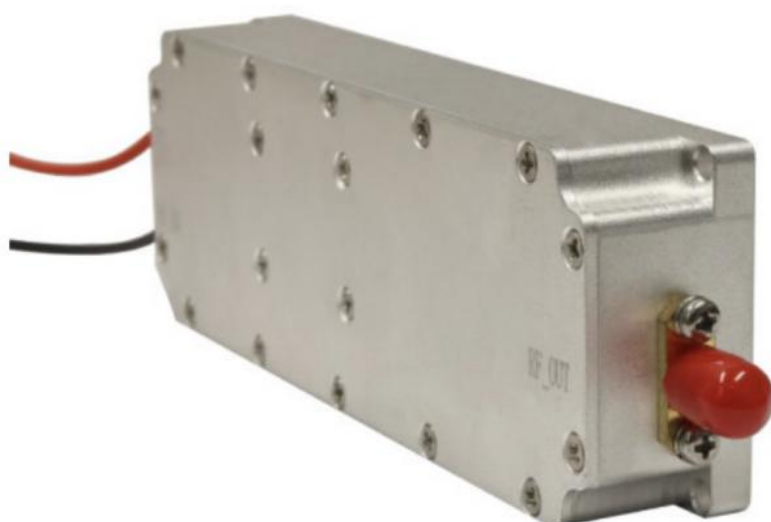

Signal Penetration: High-frequency signals can sometimes penetrate obstacles more effectively than lower frequencies, which can be an advantage in certain environments.

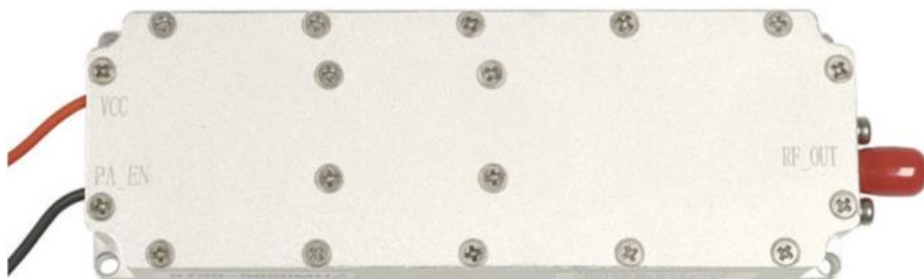

Size and Weight: High-frequency components can be smaller, which may allow for more compact and portable jammer designs.

Capability for Multiple Bands: Some high-frequency jammers are capable of affecting multiple frequency bands simultaneously, increasing their versatility.

Rapid Response: High-frequency jammers can often switch targets or frequencies quickly, providing a rapid response to changing threats

2, Functional highlight

3, Specification

Product Name	RF power amplifier module (GaN)
Frequency	900MHZ (810-900/860-930/800-900/750-850/900-1000)
Output Power	50W
Frequency and Power Customization	Support
Max Gain	47 dBm
Voltage	24-32V
Product Size	29.7*131*15.5mm
Product Weight	183 g

4, After-Sales service

Lifetime free model library upgrades, profesdional 24/7online service, customizable colors and languages.

5, Company profile

Chongqing Miao Yi Tang Technology Co., Ltd. is a cutting-edge enterprise forged through collaboration between the Internet of Things Research and Development Center of the Chinese Academy of Sciences, Sichuan University Zhisheng Software Co., Ltd. (002253), and a dedicated founding team backed by a \$12 million investment.

Leveraging the robust scientific research capabilities of the Chinese Academy of Sciences and the industry-defining expertise of Sichuan University, MYT technology is dedicated to pioneering advancements in the national security domain through the application of Internet of Things and artificial intelligence technologies. Our focus lies in AIoT research and development, spearheading the creation of an independent AIoT cloud+edge computing system architecture. This breakthrough architecture facilitates the seamless integration of heterogeneous perception information-such as electromagnetic, optoelectronic, visual,

and location data—culminating in a comprehensive three-dimensional defensesystem against intrusion.

Our signal jammers are now widely used across various industries, particularly for countermeasures against drones. We are continuously evolving our products based on actual conditions, and our research and development of jamming modules for drone countermeasures has always been at the forefront of the industry.

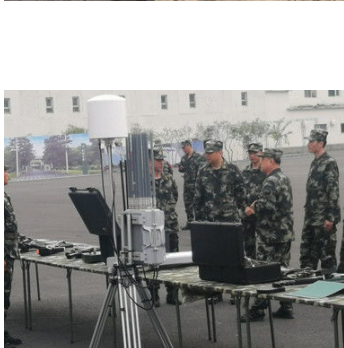

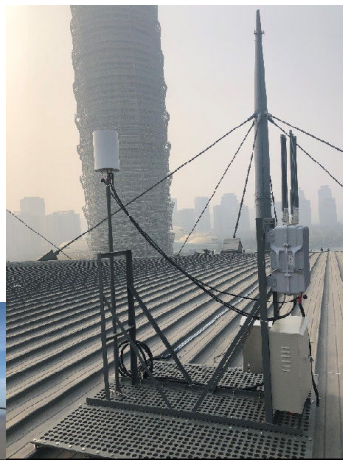

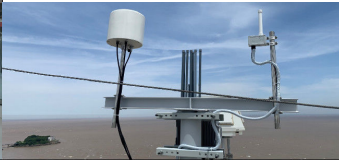

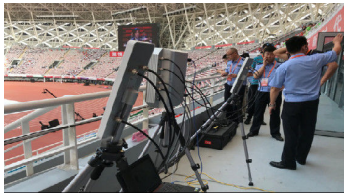

6, Certification Certificate

The product has obtained dual certification from the Ministry of Public Security and the National Security Center, and is capable of adapting to various severe incidents, possessing military-grade quality.

7, Partnership Portfolio

Our products are designed for a variety of public safety scenarios and have long provided customized product services to the military and public safety departments, earning an excellent reputation in practical operations.
