

Handheld Drone Detector with 300MHz-6200MHz Frequency Range $\geq 2\text{km}$ Detection Radius and $\leq 3\text{s}$ Response Time

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: MYT
- Certification: CNAS、CMA、CAL、ILAC-MRA
- Model Number: DF-02
- Minimum Order Quantity: 1
- Price: Pricing is negotiable based on order quantity
- Delivery Time: 10 work days
- Payment Terms: L/C,T/T
- Supply Ability: 1000units per month

Product Specification

- Frequency Range: 300MHz-6200MHz (Customizable Frequency)
- Detection Radius: $\geq 2\text{km}$
- Detection Response Time: $\leq 3\text{s}$
- Power Supply: Two Lithium Batteries, Each One 3500mAh, Battery Life $\leq 5\text{h}$; Support Battery Replacement
- Boot Time: 3s
- Dimension (L*W*H): 129mm*62mm*55mm(without Antenna)
- Screen Size: 1.77 Inches
- Working Temperature: $-20 \sim +55$
- Highlight: **300MHz-6200MHz Handheld Drone Detector, $\geq 2\text{km}$ Detection Radius Drone Detection Device, $\leq 3\text{s}$ Response Time Portable Drone Detector**

HANDHELD DETECTOR

1, Overview

The handheld drone detector can identify quad-rotors, fixed-wings, DIY drones, FPV drones, etc., by adopting self-developed low-power digital receiving technology, signal detection algorithm, and advanced drone identification algorithm.

2, Feature

This handheld drone detector is a professional-grade drone detection device that integrates advanced signal detection technology and intelligent recognition algorithms, enabling effective identification and tracking of various drone signals. The device is compact, lightweight, and easy to operate, making it suitable for a variety of security and monitoring scenarios.

The detector has comprehensive drone model recognition capabilities, enabling accurate detection of mainstream brand drones on the market, including well-known brands such as DJI, Autel, HUBSAN, and Xiaomi. At the same time, it also supports the detection of professional-grade drone equipment such as Skydohr, TBS, ELrs, Futaba, and Foxeer, as well as special types of drones like FPV racing drones, ensuring reliable detection results in various application scenarios.

The device adopts full-frequency band detection technology, with an operating frequency range covering 300MHz to 6200MHz, capable of capturing various signals such as drone communication, control, and image transmission. This wide frequency coverage ensures effective detection of almost all types of drones on the market. In addition, the device supports customized frequency ranges, which can be adjusted according to specific needs to improve the targeting and accuracy of detection.

The detector has powerful firmware upgrade capabilities, allowing users to flexibly set detection frequency bands as needed to achieve focused monitoring of specific frequency ranges. At the same time, the device supports online updates of the model library, enabling timely addition of new drone model recognition data to ensure that the device always maintains the latest detection capabilities. This continuous upgrade feature allows the device to adapt to the ever-changing drone technology and market demands.

The device adopts a user-friendly design, equipped with a single external high-efficiency ultra-wideband antenna to ensure the stability and sensitivity of signal reception. Its compact size and lightweight design make it easy to carry and operate, suitable for long-term use. Both professional security personnel and ordinary users can quickly master the use of the device to achieve effective monitoring of surrounding drone activities.

In summary, this handheld drone detector, with its comprehensive model support, full-frequency band detection capability, flexible upgrade function, and convenient operation experience, has become an ideal choice in the field of drone prevention and control. It can provide reliable technical support for security of important places, monitoring of large-scale events, and personal privacy protection.

3, Technical Specifications

Frequency Range	300MHz-6200MHz (Customizable frequency)
Detection Radius	≥2km
Detection Response Time	≤3s
Power Supply	Two lithium batteries, each one 3500mAh, battery life ≤5h; support battery replacement
Boot Time	3s
Dimension (L*W*H)	129mm*62mm*55mm(without antenna)
Screen Size	1.77 inches
Working Temperature	-20°C~+55°C

4, Application Scenarios

5, Certification Certificate

6, Company profile

Chongqing Miao Yitang Technology Co., Ltd. is a specialized company engaged in anti-drone and unmanned intelligent defense management. With the technical support from the AI Internet of Things Research Institute of the Chinese Academy of Sciences and collaborations with multiple intelligent AI companies, the company has established research laboratories for AI unmanned field products, accumulating a variety of technical patents.

The company's products are widely applied to unmanned automatic management solutions for various defense and perimeter areas, including AI anti-drone systems and AI unmanned vehicle patrol systems. These systems integrate with multiple technologies such as optoelectronics, radar, vibration, thermal imaging, facial recognition, and radio frequency management, truly achieving a 24-hour uninterrupted anti-drone defense and ground perimeter defense warning system. This allows for cost savings for clients, reduction in human resource allocation, and

ensures the safety of clients' lives and property. The outstanding security system has won the company an excellent reputation and created higher value for its partners.

7, Customer Service

- 1). We offer 24 hours service after sales
- 2). If there are any usage or quality issues with the product, we provide online technical support to diagnose the cause of the problem.
- 3). Should you find the products unsatisfactory, kindly return it to us within a period of 3 months from the date of dispatch. Upon receipt and inspection, should the products be found to be free from any damage attributable to human factors, a full refund will be granted. Alternatively, we can engage in discussions to amend the product and subsequently reship the product to you.

CUSTOMER SERVICE

- * Fast and patient communication: professional sales reply immediately
- * Fast delivery: usually 2-7 days
- * Flexible Safe shipping: fast by air or sea with cheap freight
- * Customer-friendly: complete user manual and exact video training provided
- * After sales service: one year warranty and life time technical support
