

Medium-Range X-Band Phased Array Anti-UAV Radar With Cloud And Rain Noise Suppression Function

Basic Information

Place of Origin: ChinaBrand Name: MYT

Certification: CNAS、CMA、CAL、ILAC-MRA

Model Number: DD-R32 Minimum Order Quantity: 1

• Price: Pricing is negotiable based on order quantity

Delivery Time: 10 work daysPayment Terms: L/C,T/T

Supply Ability: 1000units per month

Product Specification

. TAS Tracking Target Count:≥6

Minimum Detection Altitude:≤10m

Velocity Range: 1m/s~100m/s

Resolution Ratio: Distance: ≤15m, Azimuth: ≤6°, Elevation:

≤12°

• Operating Temperature -40 +70

Range:

• Size: ≤ 432mm*316mm*2 10 Mm

• Power Dissipation: ≤200W

• Supply Electricity: AC220V/DC24V

• Levels Of Protection: IP66

Joggle: RJ45 Network Port Highlight: X-Band anti UAV radar,

phased array radar with noise suppression,

medium-range anti-drone radar

The DD-R32 medium-range X-band phased array radar

1, Product Overview

The DD-R32 medium-range X-band phased array radar is equipped with a fully solid-state, fully coherent, and pulse Doppler system. This setup enables it to conduct all-weather detection and early warning of "low, small, slow" targets. By leveraging machine learning and Al-based trajectory feature recognition, the system attains ultra-low false alarm rates. Additionally, it can effectively detect and categorize a variety of targets, including drones, light aircraft, helicopters, powered triplanes, airships, and airborne balloons.

2, Function

The product makes use of advanced machine learning technology. This allows it to adapt to battlefield environments and be directly deployed upon installation, without the need for parameter adjustment. The system is characterized by robust detection capabilities and an extremely low false alarm rate, effectively detecting the maneuvering flight of unmanned aerial vehicles. To guarantee reliable all - weather operation, the product is equipped with cloud and rain noise suppression functionality, enabling continuous operation under various weather conditions.

Regarding scanning modes, the system offers two directional scanning methods: "one - dimensional mechanical scanning + one - dimensional phase scanning" and "two - dimensional phase scanning". It can achieve both 360° all - around spatial detection and precise monitoring of key areas. The two modes can be flexibly switched without the necessity of software modification. The product simultaneously integrates mechanical scanning tracking and phase scanning TAS tracking functions to ensure continuous and stable target tracking.

Al recognition technology based on "track features" enables the system to accurately classify and identify multiple target types, including drones, birds, personnel, and vehicles. The built - in automatic positioning and calibration module can automatically perform equipment leveling and north calibration functions, simplifying the operation process. Furthermore, the system provides flexible setting functions for distance and elevation scanning ranges, enabling users to make personalized configurations according to actual requirements.

6, Company profile

Chongqing Miao Yitang Technology Co., Ltd. is a specialized company engaged in anti-drone and unmanned intelligent defense management. With the technical support from the AI Internet of Things Research Institute of the Chinese Academy of Sciences and collaborations with multiple intelligent AI companies, the company has established research laboratories for AI unmanned field products, accumulating a variety of technical patents.

The company's products are widely applied to unmanned automatic management solutions for various defense and perimeter areas, including Al anti-drone systems and Al unmanned vehicle patrol systems. These systems integrate with multiple technologies such as optoelectronics, radar, vibration, thermal imaging, facial recognition, and radio frequency management, truly achieving a 24-hour uninterrupted anti-drone defense and ground perimeter defense warning system. This allows for cost savings for clients, reduction in human resource allocation, and

ensures the safety of clients' lives and property. The outstanding security system has won the company an excellent reputation and created higher value for its partners.

7, Customer Service

- 1). We offer 24 hours service after sales
- 2). If there are any usage or quality issues with the product, we provide online technical support to diagnose the cause of the problem.

 3). Should you find the products unsatisfactory, kindly return it to us within a period of 3 months from the date of dispatch. Upon receipt and inspection, should the products be found to be free from any damage attributable to human factors, a full refund will be granted. Alternatively, we can engage in discussions to amend the product and subsequently reship the product to you.
