- Cell: 25.9V/10A
- Continuation Of The Journey: 50min
- Highlight: compact anti drone jammer , directional antenna drone jammer , portable shield countermeasure device

Product Description

shield type countermeasure

1, Product overview

The DR500-2 is a compact, portable shield-type countermeasure device featuring a built-in directional antenna for precise drone targeting. It supports single-frequency operation or simultaneous countermeasure activation, effectively cutting off drones' GPS and video transmission to force them to land or return, thereby ensuring low-altitude flight safety.

6, Company profile

Chongqing Miao Yitang Technology Co., Ltd. is a specialized company engaged in anti-drone and unmanned intelligent defense management. With the technical support from the AI Internet of Things Research Institute of the Chinese Academy of Sciences and collaborations with multiple intelligent AI companies, the company has established research laboratories for AI unmanned field products, accumulating a variety of technical patents.

The company's products are widely applied to unmanned automatic management solutions for various defense and perimeter areas, including AI anti-drone systems and AI unmanned vehicle patrol systems. These systems integrate with multiple technologies such as optoelectronics, radar, vibration, thermal imaging, facial recognition, and radio frequency management, truly achieving a 24-hour uninterrupted anti-drone defense and ground perimeter defense warning system. This allows for cost savings for clients, reduction in human resource allocation, and

ensures the safety of clients' lives and property. The outstanding security system has won the company an excellent reputation and created higher value for its partners.
