## Directional Drone Jammer Man portable defense system Hand held drone jamming equipment KZ-17P

### 1, Product Introduction

The KZ-17P is a specialized single-soldier portable device that boasts the longest strike distance among similar equipment on the market. Designed to target and neutralize low-altitude, slow-flying, and small unmanned aerial vehicles, it operates by actively disrupting critical drone systems including flight control mechanisms, real-time image transmission links, and satellite navigation signals. Through this targeted signal interference, the device effectively compels such drones to either make a forced landing or be completely repelled from the intended area of operation.
