Product Description

Directional Drone Jammer Man portable defense system Hand held drone jamming equipment KZ-17P

1, Product Introduction

The KZ-17P is a single-soldier portable device that boasts the longest strike distance among similar equipment. It operates by disrupting the flight control systems, real-time image transmission links, and satellite navigation signals of low-altitude, slow-flying, and small unmanned aerial vehicles, effectively compelling such drones to make a forced landing or driving them away from the target area.
