Directional Drone Jammer Light weight anti drone gun

1,Product Introduction

The KZ-21(Hummingbird) is an independently developed lightweight single-soldier device, a powerful tool for drone control within the visual range.

This device operates on the principle of emitting high-intensity electromagnetic waves at specific frequency bands to interfere and counteract the video transmission, data transmission, and positioning signals of drones, forcing unauthorized drones to leave or land. With a total weight of 2kg, compact size, and light weight, this device boasts fast response speed. It can be used independently or in conjunction with drone detection equipment. It is a cost-effective, highly maneuverable portable individual drone countermeasure device, widely applicable in patrol reconnaissance, escort protection, area defense, and other fields.

2,Functional highlight

- **Military-grade Quality:** Excellent heat dissipation, unfazed by harsh weather conditions.
- **Long Battery Life:** Rechargeable lithium battery pack, with strong endurance capabilities.
- **Lightweight Design:** Compact and lightweight, suitable for personal carry.
- **Strong Environmental Adaptability:** Capable of adapting to complex environments such as high temperatures, extreme cold, and high altitudes.
- **High Integration:** Highly integrated microwave circuits, with a compact miniaturized antenna design.
- **Easy Operation:** Can be controlled with one hand, ready to use immediately.
